***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14 are drawn to a real-time reference monitor software product, classified in class 706, subclass 47.
  - II. Claims 15-18 are drawn to implementing a processing policy on a computer, classified in class 709, subclass 207.
2. The inventions are distinct, each from the other because: each group is directed to separate invention.
3. Inventions group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case group I has interceptors identifying and governing the activity while group II does not have interceptors identifying and governing the activity and group II has enforcing the policy responsive to the stored information while group I does not have enforcing the policy responsive to the stored information.

Art Unit: 2121

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
